

Littleton Conservation Commission

Several state scenic byways, as well as the nationally designated [Connecticut River Byway](#) go through Littleton. The Ammonoosuc River, recently designated by the state for its natural resources significance, flows through the center of town. A main artery in the state snowmobile trail system travels alongside the river, and there is a network of trails through town for multi-purpose use. The Conservation Commission maintains The Dells, a lovely natural area with a pond and wetlands.

Land conservation is a tool for Littleton's future as citizens seek to foster economic development by highlighting and protecting the community's natural assets. These resources include its scenic beauty, especially undeveloped ridge lines and rural landscapes along its scenic byways, and land that offers public recreation opportunities such as hiking and snowmobiling, and access to the Ammonoosuc River for fishing and paddling. Other important natural resources in Littleton include land around its public and private drinking water wells, land buffering the tributary streams to the major rivers, and forested tracts that are or could be managed for timber.

2014 Current Conservation Commission Members

- Melanie Harkless (Term Expires 2019)
- William Nichols, Alternate (Term Expires 2019)
- Val Poulsen (Term Expires 2020)
- Marcie Hornick, Alternate (Term Expires 2020)
- Thomas Alt, Chairman (Term Expires 2018)
- Dorothy Corey, Vice Chairman (Term Expires 2019)
- Gardner Kellogg (Term Expires 2019)
- Mary Boulanger (Term Expires 2018)
